Trafford Publishing, Canada, 2011. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.A groundbreaking hypothesis. Alien messengers are among us. They have been on this planet throughout human history. Whoever these messengers are, in a very subtle way they re trying to guide us to venture out into space and find a second home. The clues they have left us seem to indicate that they know much to well that not all of us would trust them. There would be many of us that would speculate about their true intentions. They have left us instructions on how to build a spacecraft by way of clues. We have the technology, all we have to do is use our existing technology in a different way. As we move forward with this idea we will find ourselves evolving technologically . We are in great need of free energy and transportation that goes beyond what we have today. They seem to be saying in a roundabout way it s time for the human race to step out of the cradle.
