

New Backpropagation Algorithm with Type-2 Fuzzy Weights for Neural Networks

By Fernando Gaxiola

Springer-Verlag GmbH Jun 2016, 2016. Taschenbuch. Condition: Neu. Neuware - In this book a neural network learning method with type-2 fuzzy weight adjustment is proposed. The mathematical analysis of the proposed learning method architecture and the adaptation of type-2 fuzzy weights are presented. The proposed method is based on research of recent methods that handle weight adaptation and especially fuzzy weights. The internal operation of the neuron is changed to work with two internal calculations for the activation function to obtain two results as outputs of the proposed method. Simulation results and a comparative study among monolithic neural networks, neural network with type-1 fuzzy weights and neural network with type-2 fuzzy weights are presented to illustrate the advantages of the proposed method. The proposed approach is based on recent methods that handle adaptation of weights using fuzzy logic of type-1 and type-2. The proposed approach is applied to a cases of prediction for the Mackey-Glass (for $\hat{\sigma}=17$) and Dow-Jones time series, and recognition of person with iris biometric measure. In some experiments, noise was applied in different levels to the test data of the Mackey-Glass time series for showing that the type-2 fuzzy backpropagation approach obtains better behavior and tolerance...

Reviews

Unquestionably, this is actually the very best work by any article writer. It usually does not price a lot of Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Augustine Pfannerstill**

This sort of pdf is everything and made me searching forward plus more. Better then never, though i am quite late in start reading this one. You may like just how the author compose this book.
